

Farewell

(2000, revised 2008)

Derek Keller

Farewell addresses the idea of traumatic loss. When dealing with loss, one can experience various and sometimes radically shifting emotional states. Quite simply, four emotional states are represented here through four different musical behaviors. At the beginning of the work these behaviors shift or blend very coarsely at first, as people sometimes experience shifting moods and emotions when grieving a loss. Through the four cyclical movements that structure the work, the musical behaviors intercut and combine at greater and more extreme degrees, to the point where elements of all four behaviors are compressed together to create “hybrid” behavioral states. I offer a metaphorical example: one could be laughing, then laughing nervously, then break into uncontrollable tears; one may wish to “talk about it,” yet not be able to find the words to describe the way he or she feels.

Farewell was composed for and is dedicated to Mark Menzies.

Performance Notes

This piece requires a sound engineer. The violin must be amplified and mixed so that it matches the levels of the Audio Playback part. This is optimally achieved with one or two microphones suspended on boom stands above the performer's head. The viola should also be amplified in its resting position (lying flat on a table stage right of the performer). The Audio Playback part should sound through two speakers house left and the right of the performer.

Glissandos:

Bow Pressure:

Increasing, then decreasing bow pressure, achieving a moderately harsh tone, some pitch always present

Increasing bow pressure, achieving a very harsh tone with some pitch

Very heavy bow pressure, very slow bow speed, virtually no pitch, "burpy"

Micotones (all accidentals carry through measure and tie):

- ♯ = 3/4 sharp
- ♯ = 1/4 sharp
- ♭ = 1/4 flat
- ♭ = 3/4 flat

Other notations:

- > = change in position of bow; from *sul pont.* to *ord.*, for example
- (*sul pont.*)-----> = a continuation of a particular bowing technique or octave state.

On playing the viola:

For the first Refrains I, II, and III the viola is to remain lying on a table stage right of the performer. The table should be high enough so that the performer can execute the bow strokes without causing undue stress on the wrist or back. In Refrain IV, the performer plays the viola in the normal position.

On the Audio Playback part:

The notations that appear in the Audio Playback staff reflect the most prominent musical features in the sound mix and are presented to assist the performer in staying in sync.
